2. SET UP IN MAGENTO

Configuration

Go to **System > Configuration > Sales > Order Numbers** to configure your chosen settings in Magento.

Order Numbers

Settings		
Invoice Prefix	<input type="text"/>	[STORE VIEW]
Shipment Prefix	<input type="text"/>	[STORE VIEW]
Creditmemo Prefix	<input type="text"/>	[STORE VIEW]

Choose a prefix for invoices (e.g. INV-), shipment (e.g. SHIP-) and credit memo (e.g. CREDIT-) numbers.

If you are using an older version of this extension, you'll also see an option under **System > Configuration > Sales > Order Numbers > Prevent Duplicates**. Set this to "Yes".

Note: This step is not needed for newer releases of this extension - this will happen automatically.

How to Use the Extension

Once installed, all new invoices, shipments and credit memos will be automatically assigned the same number as the related order. For example, for order #1000, the associated invoice would be #1000, the shipment #1000, and the credit memo also #1000.

In the event that there are multiple invoices, shipments and/or credit memos associated with the same order, duplicate separation will happen automatically. For example, the first invoice would be #1000, the second #1000-1, the third #1000-2, and so on.

Want to fully customise Order, Invoice, Shipment and Credit Memo Numbers?

With the Fooman Order Number Customiser extension, you can fully customise order, invoice, shipment and credit memo numbers using any combination of letters, numbers and dates. Set your own starting numbers, increments, lengths and more.
